PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with hands-on experience in Java, Python, JavaScript, React.js, SQL, and AI/ML. Experienced in developing software, AI-powered applications, and web solutions through internships and academic projects. Strong problem-solving and learning abilities, seeking an entry-level software development opportunity.

EDUCATION

Mahendra Engineering College, Mallasamudram, Namakkal	2023 – 2027
B.E. Computer Science & Engineering - CGPA: 7.98	
HSC — AC Gov- Higher Secondary School, Keelapalur, - 67%	2023
SSLC — AC Gov- Higher Secondary School, Keelapalur. - 100%	2021

INTERNSHIP

Infosys 6.0 Virtual Internship	2026
- Completed an internship focused on software development and application development. - Gained hands-on experience in problem-solving, programming, and project development. - Worked on an On-Demand Task Assistance Application as part of the internship.	
ServiceNow – Virtual Internship Program	2026
Gained practical knowledge of the ServiceNow platform, IT service management, workflows and enterprise solutions.	
Salesforce Developer with Agentblazer Champion Program May – July	2025
Smart Bridge Salesforce AICTE	
- Completed an 8-week virtual internship focused on Salesforce development and platform fundamentals. - Gained hands-on experience in Apex, Lightning Web Components, Data Management, Security Management, and Process Automation. Completed practical tasks and Superbadge units, including Apex Specialist and Object Relationships. - Developed foundational knowledge of Salesforce development and Agentblazer concepts.	

PROJECT

Smart AI Meeting Companion	2025
- Developed an AI-powered meeting assistant to convert meeting conversations into structured notes and summaries. - Generated key discussion points and questions to improve understanding and knowledge retention. - Designed an interactive workflow to review and validate AI-generated content.	
Technologies Used	
HTML, CSS, JavaScript, React.js, Python, AI/ML, Prompt Engineering, REST APIs, MongoDB, Chrome Extension APIs.	
Fire Fighting Robot – IoT Based	2024
- Developed an IoT-based fire-fighting robot capable of detecting fire and moving toward the affected area. - Integrated sensors to detect fire and automatically control the robot's movement. - Implemented a water-pump mechanism to extinguish the detected fire. - Designed the system to reduce human involvement in hazardous fire situations.	
Technologies Used	
Arduino UNO, Flame Sensor, Temperature Sensor, Motor Driver, DC Motors, Water Pump, Relay Module, and Embedded C/C++.	

TECHNICAL SKILLS

• Languages	Java, Python.
• Web /Backend	HTML, CSS, JavaScript, React.js.
• Database	MongoDB, MySQL.
• AI/ML	Machine Learning, Pandas, Prompt Engineering.
• Areas of Interest	Software Development, Artificial Intelligence, Machine Learning, Web Development

CERTIFICATION

- SnowPro Associate: Platform - Snowflake
- Salesforce Developer - Agentblazer Champion Program.
- Java Foundation Certification - Infosys Springboard.
- Infosys Springboard Python Certification
- NPTEL - Programming in Java.
